

Starting Self-Boarding operation for international flights ~"New normal" departure for "Contact-less"~

Tokyo International Air Terminal Co.,Ltd. shall announce that Self-Boarding Gates trial have been released for international departure process at Haneda/Terminal 3.

So far, an airline staff scans boarding pass on behalf of passengers to guide them into the aircraft at the Gate concourse. With the new automated facility, passengers can scan their boarding passes by themselves and pass through the gate to the aircraft in accordance with the digital sign or flapper doors.

This new gate makes final departure process smoother as well as improves staff efficiency for gate handling. Also, self-operation is one of safety measures for COVID-19 outbreak from the point of completely "Contact-less" operation.

**The operation is scheduled to be released by airlines once each airline gets ready

We, Tokyo International Air Terminal Co.,Ltd. will enhance the airport values and provide best services for departing passengers and airport staff.
